

ResumePilot AI

AI-Powered Resume Optimisation
& ATS Scoring Engine

Stop guessing. Start optimising.

Abdu Ali Adem | Kanz AI Hackathon | 2026

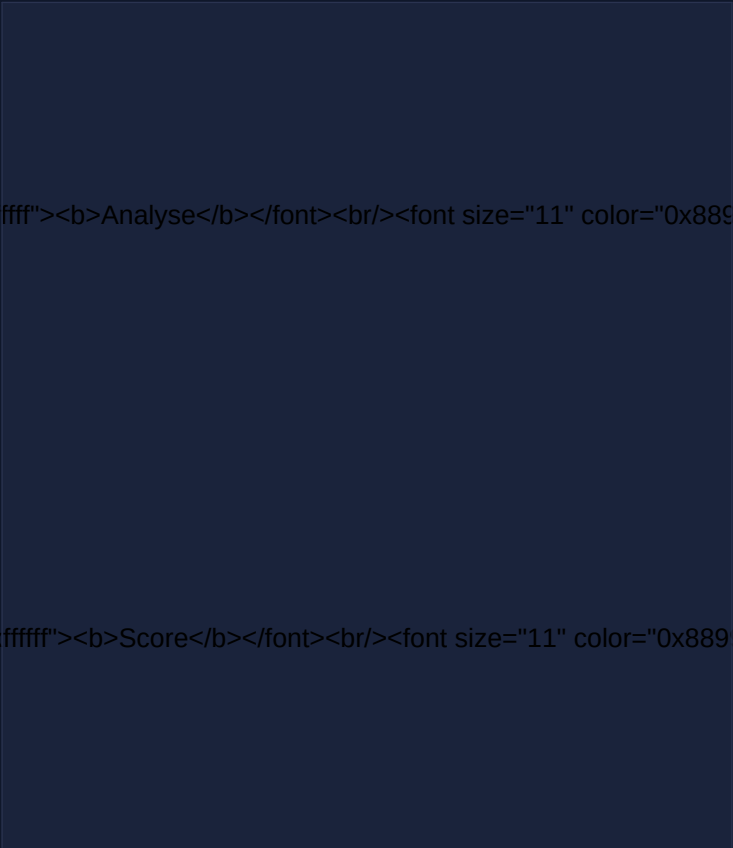

The Problem

Job seekers are flying blind into the biggest hiring filter they face.

- 90% of large companies use Applicant Tracking Systems (ATS) to filter resumes
- Qualified candidates get rejected — not for lack of fit, but for missing keywords
- No feedback loop — candidates never know why they're rejected
- The ATS is a black box with zero visibility into what it's looking for
- Hours spent tailoring each resume with no data to guide the effort

The Solution

ResumePilot AI gives candidates the same visibility into hiring that recruiters already have.

How It Works

1. Upload & Parse

Upload your resume (PDF, DOCX, or TXT). The app extracts and cleans the text using pdfplumber or python-docx.

2. AI Analysis

Gemini 2.5 Flash performs semantic analysis — understanding intent, not just keyword counting. Combined with a custom scoring engine.

3. Results Dashboard

View your ATS match %, keyword density chart, missing skills, interview tips, and detailed scoring breakdown.

4. Actionable Outputs

Get a rewritten resume with missing keywords injected, a tailored cover letter, career coaching tips, and a downloadable PDF summary.

Key Features

Technology Stack

Frontend / UI

Streamlit, Plotly Express, HTML/CSS

AI Engine

Google Gemini 2.5 Flash, Prompt Engineering, Semantic Analysis

Backend / Parsing

Python, pdfplumber, python-docx, Pandas

Output / Export

ReportLab (PDF), Natural Language Generation

DevOps / Tools

Git, GitHub, Streamlit Cloud, VS Code

Future Roadmap

■ Resume Version History

Track score improvements over multiple iterations

■ Job Recommendation Engine

Analyse your resume and suggest matching roles from live job boards

■ LinkedIn Profile Analyser

Extend optimisation beyond resumes to full professional presence

■ SDK Migration

Upgrade from deprecated google.generativeai to the new GenAI SDK

■ Academic CV Mode

Tailored version for academic CVs and grant applications

■ Recruitment Side Tool

Help hiring teams write better job descriptions

■ Subscription Tier

Supabase auth + Stripe billing — already prototyped

Thank You
